

AKSHAT TIWARI

Full-Stack Engineer | AI Practitioner

Noida, Uttar Pradesh | +91 7523013347 | akshattiwari2141@gmail.com
LinkedIn: [linkedin.com/in/builtby-akshattiwari](https://www.linkedin.com/in/builtby-akshattiwari) | GitHub: github.com/akshattiwari-dev
LeetCode: leetcode.com/u/akshat-tiwari

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (2027 batch, 0 backlogs) who builds full-stack products and the AI/backend systems behind them. Hands-on with the MERN stack, REST API design, authentication, blockchain and RAG pipelines, backed by 130 LeetCode problems solved and DSA practice in C++ and Python. Seeking a Specialist Programmer role to build reliable, production-grade software.

EDUCATION

B.Tech, Computer Science & Engineering

2023 – 2027

KCC Institute of Technology and Management, Greater Noida (Affiliated to AKTU) | CGPA: 7.18 | Backlogs: 0

Class XII: 82%

Class X: 78.3%

TECHNICAL SKILLS

Languages	Python, C/C++, JavaScript, TypeScript, SQL
Web & Backend	React.js, Next.js 15, Node.js, Express.js, TailwindCSS, REST APIs
Databases	MongoDB, MySQL
AI / ML	RAG, LangChain, LlamaIndex, Google Gemini AI, Vercel AI SDK
Core CS & Security	Data Structures & Algorithms, System Design, Authentication (OAuth 2.0, JWT)

PROJECTS

ReputeChain – Decentralized Reputation Platform

Ethereum, Solidity, React, Node.js

- Built a decentralized trust and reputation platform on the Ethereum blockchain (testnet) using smart contracts to issue verifiable, tamper-proof credibility scores.
- Kept raw scores on-chain and cached derived rankings off-chain to avoid recomputing from the chain on every read; mirrored the scoring logic in a Node worker to prevent on-chain/off-chain mismatches.

SyncRank – Real-time Competitive Programming Leaderboard

React, Node.js, MongoDB

- Developed a cohort leaderboard that aggregates LeetCode and Codeforces submissions into one unified ranking for peer benchmarking.
- Designed a jittered polling sync (45–90 s interval) that degrades gracefully on rate limits or failed polls, and stored raw submission snapshots to debug sync drift.

Open_authtool – Authentication & Access Management Layer

Node.js, Express, OAuth 2.0, JWT

- Built an auth layer covering secure token generation, user sessions and permission validation, designed to plug into full-stack applications with few opinionated defaults.
- Used 15-minute access tokens with 7-day refresh tokens and explicit session revocation to limit the impact of a leaked token.

EXPERIENCE

AI Trainer – Madhya Pradesh Government (EQIP Programme)

2025

- Selected as an AI Trainer for a state government initiative; trained 30 government school teachers per day over a 6-day programme on AI tools and smart learning methodologies.

CERTIFICATIONS

- Infosys Springboard – Introduction to Artificial Intelligence, Introduction to Deep Learning, Computer Vision 101
- Kaggle Learn – Data Science & ML Micro-courses | Hugging Face – NLP Course | Oracle Certification

ACHIEVEMENTS & CODING PROFILE

- Solved **130** problems on LeetCode; earned the **50 Days** and **100 Days** badges for consistent practice.
- Reached the second-last shortlisting round in HackerRank Spark 4.
